(If existing, e.g. suABC123) _____

Platform: _____ IP address: _____

Present SAS version: 9.2 9.3 none

Requested service: new extend

Requested SAS version: 9.2 9.3

The delivery of the SAS software is based on a contract between Kiel University and SAS Institute GmbH.

The University is obligated to list all PC installations and users. Students and employees who are only working temporarily at PC installations do not need to be listed. Other changes have to be reported to the Rechenzentrum immediately.

If SAS is installed on a server, it is required to make sure that all computers that can access the software are listed by the Rechenzentrum. If SAS should be used by additional computers this has to be reported to Rechenzentrum **before** usage, so that licensing can be checked.

Creation of copies (apart from backups) or to pass over the software to others is **not permitted**.

One SAS license costs **EUR 320.00** per year per PC. This amount will be billed by Rechenzentrum. The license includes provision and support of the software, i.e. new versions will not be charged.

Print-outs of SAS documentation are only permitted for internal purpose and must not be dealt.
